

## QUALITY POLICY

We strive to be among the top providers in our sector in the global market.

To achieve this aim we should be aware of our customers' needs and requirements by taking the time to communicate with them directly, to understand, identify and MEET THEIR NEEDS. We must ensure compliance with all regulations, both mandatory and optional, that are applicable to our products.

We must be the company to bring innovation, we have never liked to "copy", because copying means coming in second place or, in other words, last.

We must always remember that the success of our customers runs parallel to our own.

To achieve this, we know that we must merge our company culture with the principle of CONTINUOUS IMPROVEMENT, applying it day by day at both a personal and team level.

We are confident that our primary and irreplaceable resource is people and their skills which combines the knowledge of more experienced workers with the enthusiasm of the new-comers and their creativity and desire to be part of the team.

To be successful, we feel it is essential that those who work with us are not just proud of what we do, but why we do it.

We are always confident that we can fill some of the gaps in the market and try to establish ourselves as the point of reference for our customers.

We must consider our suppliers as partners rather than just providers of work and materials and share with them our own needs and expectations as well as those of our customers, as if we are working together in a single team.

We are proud of what we do and we want our customers to feel the same way when they use our products.

PE.DI s.r.l.
